

HOSPITAL SYSTEM CHOOSES LENOVO TO TRANSFORM PATIENT CARE AND SUSTAINABILITY

FAST FACTS

Opened in **1894**

Averages more than **1 million** patient visits annually

Sustainability efforts include a leading **healthcare recycling program** and LEED certified facilities

Intel Inside®
Powerful Solution Outside.

THE SITUATION

IT Innovation in Healthcare — The multiple monitor system used to enhance patient care and staff efficiency required a powerful IT network that was both cost-effective and space-saving

Security — Strict HIPAA compliance necessitated patient data be kept safe from external threats, including controlled access to removable storage

Resource Sustainability — Desire to minimize the system's environmental impact and operational costs dictated a solution that reduced energy consumption

LENOVO SOLUTION

- Lenovo™ ThinkCentre® M93p Tiny desktops, with Intel® Core™ i7 processors, freed up desk space while bringing full-sized PC productivity as well as support for up to three displays for clinical workflows
- Smart USB protection was implemented to keep patient data safe, allowing for standard peripherals to be connected while simultaneously blocking those that might threaten data security
- Tiny desktops met the client's high environmental standards with 92% power utilization efficiency and multiple eco-friendliness certifications (ENERGY STAR 5.2, UL, Environment Gold, and EPEAT Gold)
