

Intermedia AppID®

Scale your cloud without sacrificing security or ease-of-use with a Single Sign-On portal for all your web apps.

Simplify and centralize user access to all your web apps

Improve your security by promoting strong password policies

Add 2-factor authentication to any web app

Use AppID with any web app—including those you've developed yourself

As your organization embraces the cloud, the number of web apps in your IT environment quickly adds up—and quickly overwhelms your ability to ensure security, manage costs and maintain control.

That's why you need Intermedia AppID. AppID's Single Sign-On portal provides a single point of access to all the web apps an employee uses, regardless of provider—with just one password to remember.

This gives you central control over web apps. You can manage which web apps are visible and available to which users on their portals.

The benefits of Intermedia AppID

Simplify the business cloud experience for users

- Eliminate the need to remember multiple passwords
- Eliminate the need to bookmark login pages
- Enable quick and easy access to all their web apps
- Keep users productive by eliminating the downtime caused by app switching

Reduce IT help desk calls

- Reduce the need to reset credentials or help users access their apps
- Provide simple access to web apps from virtually any device or location
- Promote strong password policies
- Add 2-factor authentication to decrease the likelihood of security breaches

Too many web apps? AppID can help.

AppID's Single Sign-On (SSO) solution lets you create a single point of access to all the web apps an employee uses, regardless of provider. With AppID in place, an employee just needs to log in once to gain access to all their web apps—instead of having to log in to each one individually.

Use it with any web app

This includes business apps, social media sites, cloud-based collaboration platforms and more.

Add your internal web apps

You can even use AppID for web apps that you've developed internally.

Enable a single point of access

The typical employee has dozens of business web apps. With AppID, they're all accessible on the same portal page.

Reduce password risks by eliminating most passwords

With AppID, users have one password for all their web apps. They're more likely to adhere to strong password policies.

Manage access on home computers, too

AppID supports all major browsers so employees can access their AppID portal from any computer.

Offer managed mobile access to web apps

AppID offers an app for iOS and a Firefox® browser extension for Android® users, giving employees access to their AppID portal on their mobile device.

Rely on Intermedia's Worry-Free Experience™

You benefit from white-glove setup and expert 24/7 phone and chat support. We keep you focused on being productive.
