

Intermedia's Private Cloud Exchange on AWS

Move your email to the cloud on your own terms—powered by the largest independent provider of Hosted Exchange.

Highly Available • Secure & Compliant • Scalable and customizable

Designed for HIPAA, SOC, PCI and other industry & compliance requirements

Intermedia, the world's largest independent provider of Microsoft® Exchange-as-a-service, leverages the AWS Cloud to provide Private Cloud Exchange on AWS. It's perfect for companies that require the security, compliance, control and flexibility of an on-premises installation with the cost effectiveness, fast deployment and scalability of the cloud.

Flexible pricing – pay on a per-user basis, and leave the hardware, software and service management to Intermedia and AWS.

Built on Amazon's web services and managed by Intermedia, the company that 70,000 businesses trust every day

Provides flexibility, integration and customizations typically only found in on-premises builds.

Available for SecuriSync® file backup & sharing, Skype® for Business, and SharePoint as well.

Enterprise-Grade Email Built on AWS

- **Dedicated Microsoft Exchange®.** Get the best of both worlds: the efficiency and cost benefits of the cloud with the level of control, compliance and customization that your business requires.
- **Full-featured Business Email.** Share and sync your email, calendar, contacts, tasks and policies across virtually all user devices.
- **Private Cloud.** A single-tenant deployment for your enterprise provides flexibility for additional security customization and integration options.
- **Integrate it with your business applications.** Private Cloud Exchange on AWS is designed to work with your on-premises, proprietary, and industry-specific software.
- **Centralized management.** Intermedia's HostPilot® control panel gives you visibility and control over your Exchange service and users.
- **Premium support and migration.** Customized implementation by Intermedia's cloud experts.

Move your email to a Private Cloud with the leaders in the market:

Trusted by more than 1 million businesses.

INTERMEDIA

Trusted by more than 70,000
business worldwide.

Exchange powered by AWS: A leading cloud infrastructure platform.

- **Comprehensive security capabilities** with a breadth of security add-ons to increase privacy and control network access.
- **Governance-focused features with applicable compliance standards.** AWS engages with independent third-party auditors to maintain security and data protection in the cloud.
- **Global Infrastructure.** AWS offers a choice of 11 geographically-isolated regions located all over the world.
- **Engineered for the most demanding requirements.**
- **No license lock-in.** Use or move existing licenses as you choose.
- **Advanced data replication** in different geographies to meet corporate recovery time objectives (RTOs).
- **Powerful infrastructure analytics.**

AWS Compliance

The AWS cloud infrastructure has been designed and managed in alignment with regulations, standards, and best-practices including HIPAA, SOC 1/SSAE 16/ISAE 3402 (formerly SAS70), SOC 2, SOC 3, PCI DSS Level 1, ISO 27001, FedRAMP, DIACAP and FISMA, ITAR, FIPS 140-2, CSA, MPA.

Intermedia is the world's largest independent provider of Exchange as a service. We were the first provider of every version of Hosted Exchange since 2000 and today we serve 70,000 businesses and 6,000 active partners.

Our Cloud Concierge team migrates 10-15,000 mailboxes per month and we've developed numerous proprietary migration tools that we deploy alongside 3rd-party tools to migrate email from virtually any source environment.
