

arc + schools

Arc is a state-of-the-art platform that helps school buildings collect, manage and benchmark data to improve sustainability performance and engage students in active learning.

USE ARC IN YOUR SCHOOL TO...

MONITOR SCHOOL DISTRICT SUSTAINABILITY: In one consolidated platform, schools can track and benchmark energy, water, waste, transportation and human experience for a single school building or entire school districts.

VISUALIZE & COMMUNICATE PROGRESS: The platform is easy to use and features comprehensive analytics and universally understood building performance scores to communicate opportunities and impacts with any audience.

ACHIEVE LEED CERTIFICATION: Developed to support the mission of USGBC, Arc offers a streamlined path to achieving LEED certification or recertification.

EMPOWER STUDENTS WITH HANDS ON LEARNING: Arc gives teachers and school staff countless opportunities to engage students in real world experiences collecting and analyzing building data and acting on their findings. Arc is a powerful partner to USGBC's Learning Lab platform, which provides curriculum to support student understanding of sustainability, building STEM skills and preparing students for 21st century careers.

The Arc Performance Score

Arc calculates a performance score out of 100, based on global building data and action-oriented strategies across five categories:

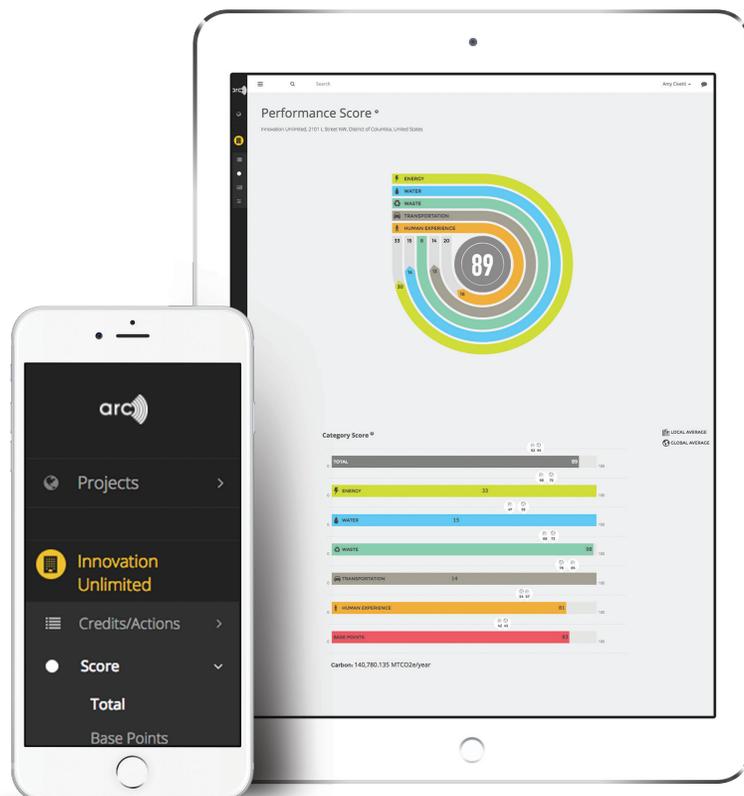

The data required for an Arc score in these five categories includes 12 consecutive months of energy and water use, and a minimum of one waste data point, occupant transportation survey, and interior carbon dioxide and interior total volatile organic compound levels. Projects looking to certify or recertify to LEED must achieve a performance score of 40 for Certified, 50 for Silver, 60 for Gold and 80 for Platinum.

FIRST YEAR FREE – GET STARTED TODAY

Arc is offering all K-12 schools that are new to the platform a FREE YEAR OF ACCESS. At the close of the first year, projects wanting to continue the use of Arc will pay the \$1500 registration fee, which will provide access for five years.

To get started, contact schools@usgbc.org.
